IDEA NAME

AgroFleet Africa

SECTOR

Agri-Logistics & Cold Chain

CORE PROBLEM & CONCEPT MECHANICS

Decentralized solar cold storage and refrigerated van-sharing for peri-urban smallholder tomato and vegetable farmers, monetized through pay-as-you-chill micro-fees and bulk off-taker marketplace take rates.

AGRI-LOGISTICS & COLD CHAIN

NEARBY AFRICAN FOCUS

✎

Edit Brief

AgroFleet Africa — Pay-as-You-Chill Solar Cold Chain

Enabling perishable food producers to mitigate 45% post-harvest loss through distributed solar-powered cold hubs at aggregation markets and IoT-tracked refrigerated transit, converting fixed cold storage CapEx into variable operating expenses.

TARGET CUSTOMER

Peri-urban vegetable
farming clusters & food
FMCG aggregators

MONETIZATION

Daily crate storage fee
(₦450/crate) + 8% off-
taker take rate

KEY VULNERABILITY

Diesel pump backup
cost & off-grid battery
replacement cycles

What to Apply When Deploying in Nigeria

- Anchor on Off-Takers, Not Subsistence Farmers:** Sign anchor take-or-pay cooling capacity agreements with organized FMCG processors (e.g. Tomato Jos, GB Foods) rather than relying solely on individual farmer micro-payments.
- Deploy Thermal Energy (Ice Bank) Storage:** Emulate Ecozen India by utilizing phase-change water/ice thermal storage to achieve 36 hours of cold retention, eliminating expensive lithium battery replacement costs under Nigerian heat.
- Offline-First IoT & Agent Verification:** Integrate USSD and Bluetooth token activation for cold room doors so operations continue during frequent rural GSM network dropouts.

What to Avoid in Nigeria (Costly Pitfalls)

- Avoid Pure Direct Equipment Sales:** Smallholders cannot afford ₦5M–₦15M cold unit capital outlays. Avoid outright asset sales without asset-finance partners or shared infrastructure models.
- Avoid Pure Card-Based Recurring Subscriptions:** Card mandates fail at over 40% in Nigeria. Implement automated wallet debits, USSD push notifications, or physical market agent collection.
- Avoid Unhedged Foreign Equipment Financing:** Equipment imported with dollar-denominated loans will trigger debt distress when Naira depreciates. Source local assembly or hedge via export-linked produce.
